

DDB
DDB-photography

Daniel Deak Bardos, freelance **photographer** and **Photoshop specialist**.

I am a photographer with a solid technical and theoretical education based on a professional apprenticeship, steadily updated through professional assignments at industry leading companies.

I offer full on-site professional action shooting services as well as high-end product photography in my own studio. I have expert knowledge in image editing, including clipping, color grading, compositing and other postproduction services.

As a passionate snow- and wakeboarder my early work was inspired by the appreciation of the sports themselves. Assignments at Snowboarder MBM (post production, graphic design), Wakeboarder Europe Magazine (photo editor) and PX5 (Photoshop operator) contributed to my detail oriented way of high-end image editing and workflow oriented design.
