

Freelancer Introduction

Henrik Frensch is an independent producer of audiovisual media in Munich and Lippstadt.

By successfully combining long-term experience with passion, commitment and dedication for our field of action, we are able to offer highly professional film productions of any kind. Our area of activity ranges from sports films, image films and films for trade to event films.

We make use of state-of-the-art technology and devices, such as steadycams, video sliders and quadrocopters.

We can realise entire film productions, but also enjoy operating as part of a production team.
