# COACH / TRAILBUILDER / EVENT - BIKE MÉCHANIC

## RIDE

### *MTB Personal Coach*

Time and money invested in new skills increase performance - and fun - more effectively than any upgraded equipment. The most important thing about biking is the fun and the joy of movement, you can learn the correct handling of your bike with me your personal freeride coach.

## BUILD

### *MTB - trail construction:*

My strengths are the experience in innovative advice and individual development, as well as the sustainable implementation of successful long-term mountain bike offers, which are tailored to the interests and needs of my clients and partners, as well as the users. A big advantage is that as a locksmith I can usually repair things myself.

## PASSION

### *MTB technology and event management:*

Quick, competent advice is the be-all and end-all of a successful sales talk and increases the customer's trust in a brand for a long time. My communicative nature, experience in public appearances and my enthusiasm for something make event appearances so much easier for me and you can see that I enjoy it.

*Life is a Freeride*
